Overall Rationale and Purpose

After a decade of concentration on “Education for All” (EFA) at primary level, Technical and Vocational Education and Training (TVET) has found its way back on national and international development agendas. In the light of the immense importance of TVET for social and economic development, collaboration of all stakeholders at all levels is the critical issue for its development, starting from local cooperation between TVET institutions and the corporate sector for improving quality and relevance, via regional cooperation in the framework of Free Trade Agreements and mobility of labour in order to make qualifications transparent and transferable over national borders, up to international cooperation in TVET research and development for developing national knowledge bases for TVET system and quality development.

The 2nd UPI International Conference is intended to bring together high level actors and grass-root workers of the global TVET sector for exchange of knowledge and of examples of good practice of collaboration at all levels, and in order to start mapping the global landscape of collaboration in TVET, especially in Asia.

Under the main theme “Collaboration in TVET” the conference will be organized along the sub-themes

1. Cooperation between TVET institutions and the corporate sector for improving the quality and relevance of TVET
2. Transparency and comparability of TVET qualifications
